

BloodTracker

High Flux Blood Tracking Flashlight

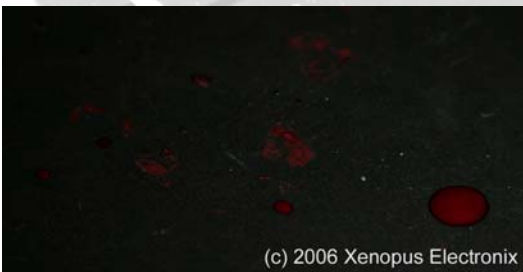

FEATURES:

- Designed for hunters and bowhunters tracking wounded animals into the night.
- Three flashlights in one!
- Select modes by pressing pushbutton switch.
- A White LED flashlight for general use.
- A low-power Red LED Flashlight to preserve your night vision.
- And, of course, a **BloodTracker** flashlight.
- 2x or 4x 18650 rechargeable battery operation.
- Regulated output ensures consistent performance.
- Useful battery life typically 3-6 hours, depending on mode.
- Glass lens with diffusing element.
- LED Lifetime 50,000 hours.
- Flashlight 5.25" long x 2.25 diameter.
- Lanyard included.
- Now with longer throw distance!
- Kit includes flashlight, batteries, charger, and a case which has room for your safety glasses.
- Featuring high power Cree XP-E and XP-E2 LED emitters.
- **Yes, we are the only ones with this PATENTED TECHNOLOGY!**

How does it work? Simply select through different modes by pressing the switch — white, red, and BloodTracker modes. The patented **BloodTracker mode** uses green LEDs in conjunction with flashing red LEDs ...

...The blood will appear to flash back at you, since the ground cover will tend to absorb red wavelengths while fresh blood will reflect it back strongly. Still pictures can't do the effect justice — one has to visualize these two pictures alternating back and forth to see this dynamic effect!

TESTIMONIALS:

- "I'm absolutely tickled with this flashlight on the grass and found every drop [of blood] in no time at all. I could see as far away as 40-50 feet then go on tracking some more ... the best thing ever!" — *Steve, IL*

PART NUMBER
XeLED-Cr5BT

DESCRIPTION

High flux BloodTracker flashlight kit: includes BloodTracker, 2x18650 cells, USA-plug charger, and carrying case.

Charge in progress (flashing red)

- INSTRUCTIONS FOR BATTERY CHARGER:**
- This unit is provided with an external 120-250 volt AC charger.
 - Alternating Red/Green LEDs on charger indicates charging.
 - Green LEDs on charger indicates charge complete.
 - Carefully observe correct battery polarity when using charger.
 - Insert two (or four) cells positive up in battery compartment, then screw battery compartment onto head of flashlight.
 - **All battery slots in battery barrel of flashlight are identical—batteries are in parallel, and insert with the same orientation.**
 - Unit will light briefly to indicate correct connection.
 - Five short flashes at power up or during operation indicates low battery condition, please recharge cells.
 - Flashlight is supplied with two cells, two additional cells sold separately.

BloodTracker

High Flux Blood Tracking Flashlight

INSTRUCTIONS FOR USE:

- Cycle modes using pushbutton switch. Modes are (1) white (2) low-power red (3) BloodTracker, then off.
- If unit does not cycle modes, batteries need recharging.
- Do not completely discharge the battery, or battery life will be reduced.
- Do not submerge in water — unit is splash-resistant, not waterproof.
- Unscrew complete head from body to access battery compartment.
- Two or four batteries may be used.
- Not a toy — keep out of reach of children!
- Battery is fully recyclable, and must be recycled in accordance with local and state guidelines.
- Glass lens can shatter if dropped, use caution.

Three modes of operation: White, low power red, and blood tracking.

INSTRUCTIONS FOR BATTERY CHARGER:

- This unit is provided with an external 120-250 volt AC charger.
- Red LED on charger indicates charging.
- Green LED on charger indicates charge complete.
- Carefully observe correct battery polarity when using charger.
